

Group annuities are intended as long-term investments designed for retirement purposes. Money taken from the annuity will be taxed as ordinary income in the year the money is distributed. Account values fluctuate with market conditions, and when surrendered the principal may be worth more or less than its original amount invested. An annuity does not provide any additional tax deferral benefit, as tax deferral is provided by the plan. Annuities may be subject to additional fees and expenses to which other tax-qualified funding vehicles may not be subject. However, an annuity does provide other features and benefits such as lifetime income payments and death benefits, which may be valuable to you.

You should consider the investment objectives, risks, and charges and expenses of the investment options carefully before investing. Prospectuses containing this and other information can be obtained by contacting your local representative. Please read the information carefully before investing.
